

Making clean, renewable energy affordable for you ...

The Atmosphere Conservancy is a 501(c)(3) non-profit organization that develops community-based renewable energy projects.

In partnership with affordable housing agencies, non-profit organizations and government entities, The Atmosphere Conservancy leverages financial resources and merges carbon reduction strategies with opportunities for job creation, economic impact, education and social services.

CLEAN

Breathing clean air, looking at clear skies, and valuing our natural environment is important to everyone. The Atmosphere Conservancy is committed to bringing clean energy to communities throughout the region, providing economic, social and environmental benefits.

RENEWABLE

By focusing on renewable energy, we focus on renewing our community. By utilizing the naturally replenished power of the sun, we tap into an ongoing source of energy for our children, and our children's children. The Atmosphere Conservancy knows that renewable energy is not only good for the environment, it is good for people, and our economy.

AFFORDABLE

With the help of community members, donors and partners, The Atmosphere Conservancy is able to leverage resources and develop creative financing strategies for community-based organizations, such as schools, non-profits, and affordable housing projects. This unique approach results in substantial cost reduction for the organizations we support and a smaller carbon footprint for the whole community.

GET INVOLVED

By supporting TAC you build a stronger, healthier, self-sufficient community. Your dollars allow us to:

- **Provide affordable, renewable energy to worthy partners**
- **Create jobs developing projects**
- **Reduce costs for our partner organizations**
- **Reduce carbon footprint**
- **Improve quality of life**

Making clean, renewable energy a reality for your community!

OUR MISSION

The Atmosphere Conservancy (TAC) supports the transition from a fossil fuel-based economy to one based on non-polluting, renewable energy sources through the development of community-based projects that demonstrate the environmental, economic and social benefits of energy efficiency and renewable energy technologies.

TAC IS EMPOWERING COMMUNITIES EVERY DAY

VILLAGES ON STANFORD: 1.26 million BTU per day solar thermal system and 15 kW solar electric system on an 82-unit affordable housing complex in Fort Collins, CO

MAPLE TERRACE: 1.62 million BTU per day solar thermal system on a 130-unit affordable housing complex in Loveland, CO

DOVE VALLEY: 50 kW of solar electric production on 10 affordable senior housing duplexes in Milliken, CO

FORTZED COMMUNITY ENERGY CHALLENGE: Energy efficiency outreach program in Fort Collins, CO

PARTNERS INCLUDE: Governor's Energy Office, Colorado Carbon Fund, Renewable Energy Trust, The Bohemian Foundation, UniverCity Connections, Energy Outreach Colorado, Fort Collins Utilities, Fort Collins Dept of Natural Resources, Fort Collins Housing Authority, Housing Authority of the City of Loveland, Milliken Housing Authority, and concerned citizens like you!
